TO CLEAN

1. Clean the lid only when cooker has completely cooled.
2. Soak the inner pot and all accessories or wash them in the top rack of the dishwasher.
3. Wipe the lid and the rice cooker's body clean with a damp cloth.
4. Thoroughly dry cooker body, lid and all accessories. Reassemble for next use.

TROUBLESHOOTING

- **Rice is too dry/hard after cooking.**
  If your rice is dry or hard/chewy when the cooker switches to Keep Warm, additional water and cooking time will soften the rice. Depending on how dry your rice is, add ½ to 1 cup of water and stir through. Close the lid and switch to **Rice**. When cooker switches to **Keep Warm** mode, open the lid and stir the rice to check the consistency. Repeat as necessary until rice is soft and moist.

- **Rice is too moist/soggy after cooking.**
  If your rice is still too moist or soggy when the cooker switches to **Keep Warm**, use the serving spatula to stir the rice. This will redistribute the bottom (moistest) part of the rice as well as release excess moisture. Close the lid and allow to remain on **Keep Warm** mode for 10–30 minutes as needed, opening the lid and stirring periodically to release excess moisture.

---

Note:

- Do not use harsh abrasive cleaners, scouring pads or products that are not considered safe to use on nonstick coatings.
- If washing in the dishwasher, a slight discoloration to the inner pot and accessories may occur. This is only cosmetic and will not affect performance.
- Any other servicing should be performed by Aroma® Housewares.
- Different types of rice may vary in their make-up, results may differ.

Helpful Hints:
The provided rice cooker cup is the equivalent to a ⅛ standard US cup.

### Note:

- Cooking times are approximate. Altitude, humidity and outside temperature will affect cooking time.
- Opening the lid during the cooking cycle causes a loss of heat and steam. Cooking time may be prolonged if the lid is opened before the rice is finished.
- Rinse rice before placing it into the inner pot to remove excess bran and starch. This will help reduce browning and sticking to the bottom of the pot.
- Want perfect rice without the wait? Use the **Delay Timer**. Simply add rice and water in the morning and set **Delay Timer** for when rice will be needed that night.

- This chart is only a general measuring guide. As there are many different kinds of rice available, rice & water measurements may vary.
- Arborio rice can also be cooked using the Sauté-then-Simmer STS® function to create a delicious risotto. See “Recipes” on page 19 to learn how.

For best results, it is recommended to puncture small holes in the paper/foil.

The countdown feature is an excellent way to plan when adding the steam tray to ensure the rice and steamed food finish cooking at the same time.

*When steaming, Aroma® recommends using 2 cups of water with the provided measuring cup.*

### Helpful Hints:

Since most vegetables only absorb a small amount of water, there is no need to increase the amount of water with a larger serving of vegetables.

Steaming times may vary depending upon the cut of meat being used.

To ensure meat tastes its best, and to prevent possible illness, check that meat is completely cooked prior to serving. If it is not, simply place more water in the inner pot and repeat the cooking process until the meat is adequately cooked.

### Note:

- Altitude, humidity and outside temperature will affect cooking times.
- These steaming charts are for reference only. Actual cooking times may vary.
- It is possible to steam at any point during the rice cooking cycle. However, it is recommended that you steam during the end of the cycle so that steamed food does not grow cold or become soggy before the rice is ready.
