GUARDAR ESTAS INSTRUCCIONES

Basic safety precautions should always be followed when using electrical appliances, including the following:
1. Important: Read all instructions before using the appliance.
2. Do not touch hot surfaces. Use handles or knobs. Metal surfaces will become extremely hot.
3. To protect against electrical hazards, do not immerse cord, plug or toaster in water or other liquid. See “How to Clean” on page 6 for instructions on cleaning.
4. Close supervision is necessary when any appliance is used by or near children.
5. Always unplug the appliance from the outlet when not in use and before cleaning. Allow to cool completely before cleaning and handling.
6. Do not operate any appliance with a damaged cord or plug. Do not use after appliance malfunctions, is dropped or is damaged in any manner. Contact Aroma® customer service for examination, repair or electrical/mechanical adjustment.
7. The use of accessory attachments not approved by Aroma® is not recommended and may cause injuries.
8. Do not use outdoors.
9. Do not allow cord to hang over the edge of the table or counter or to touch hot surfaces.
10. Do not place toaster on or near a hot gas or electric burner or a heated oven.
11. To disconnect, grasp the plug and remove from outlet. Never unplug by pulling the cord.
12. Do not use the toaster for other than its intended use.
13. Oversized foods, foil packages or utensils must not be inserted in the toaster as they present a risk of fire or electric shock.
14. A fire may occur if toasters are covered or touching flammable materials including curtains, draperies and walls during operation.
15. Do not attempt to dislodge food when the toaster is plugged into an electrical outlet.
16. To avoid the possibility of fire, do not leave the toaster unattended during use.
17. Clean out accumulated crumbs frequently to avoid the risk of fire or malfunction. Do not use foods that will drip coatings or fillings when heated. Such accumulations inside the toaster create unsanitary conditions and increase the possibility of fire or malfunction.
18. Unplug when not in use and before cleaning.
1. A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
2. Longer extension cords are available and may be used if care is exercised in their use.
3. If a longer extension cord is used:
   a. The marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance.
   b. The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled by children or tripped over unintentionally.

This appliance has a polarized plug (one blade is wider than the other); follow the instructions below:

To reduce the risk of electric shock, this plug is intended to fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to modify the plug in any way.

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or a similarly qualified person in order to avoid a hazard.

This appliance is for household use only.

USING YOUR TOASTER

Before First Use:

1. Read all instructions and important safeguards.
2. Remove all packaging materials and check that all items have been received in good condition.
3. Tear up all plastic bags as they can pose a risk to children.
4. Check the toast slots for any remaining packaging. Be sure toast slots are completely clear before use.
5. Run the toaster empty through a full cycle to allow the new elements to preheat and burn off any dust that may have accumulated during assembly.

**NOTE:**
- Do not use abrasive cleaners or scouring pads.
- Do not immerse the toaster in water at any time.

Toasting Tips:

Toasting is a combination of drying and cooking the bread. Moisture levels differ from one type of bread to another, which may result in varying toasting times.

1. For slightly dry bread, use a lower setting (1-3) on the browning control knob.
2. For fresh bread or whole wheat, use a higher setting (4-6) on the browning control knob.
3. Breads with very uneven surfaces, such as English muffins, will require a higher setting (4-6) on the browning control knob.
4. Thickly cut pieces of bread, such as bagels, will take longer to toast since more moisture must be evaporated from the bread before toasting can occur.
5. Very thick pieces of bread may require two toasting cycles.
6. When toasting breads containing fruit remove all loose pieces before placing bread in the toaster. This will prevent loose items from falling into the toaster or sticking to the guard wires.
7. Before toasting bagels, slice into two equal halves, place them in the toaster with the cut sides facing each other and press the BAGEL button. The bagel function only uses the heating wires in the middle of the unit. See “Using the Bagel Function” on page 5.
8. For toasted a single slice, use a lower setting (1-3) on the browning control knob.
9. For frozen items, such as pancakes, bagels and waffles, use the Defrost function. See “Using the Defrost Function” on page 6.
10. Use caution when toasting pastries as their filling can become very hot before the surface of the pastry becomes brown.

COMO USAR SU APARATO

Antes de primer uso:

- No use limpiadores abrasivos o estropajos.
- No sumerja el tostador en agua en ningún momento.

Tostado es una combinación de secado y cocción del pan. Niveles de humedad varían de un tipo de pan a otro, lo que puede requerir diferentes tiempos de tostado.

1. Si el pan está ligeramente seco, utilice un ajuste menor (1-3) en la perilla de control de tostado.
2. Para pan fresco o de trigo integral, utilice niveles superiores (4-6).
3. Los panes con superficies irregulares, como los English muffins, necesitan ajustar la perilla de control a niveles más altos (4-6).
4. Los panes gruesos, como los bagels, necesitan más tiempo para que se tosten, ya que deben evaporar más humedad antes de que el pan comience a tostarse.
5. Los panes muy gruesos pueden requerir dos ciclos de tostado.
6. Al tostar panes que contengan frutas, retire todas las piezas sueltas antes de colocarlos en el tostador. Esto evitará que las piezas caigan dentro del tostador o se peguen a las alambres de seguridad.
7. Antes de tostar bagels, córtelos en dos mitades iguales, colóquelas en la tostadora con las superficies de miga frente a frente y seleccione la función Bagel. Esta función sólo utiliza los alambres calefactores en el centro de la unidad.
8. Para tostar una rebanada, utilice un ajuste menor (1-3) en la perilla de control de tostado.
9. Para piezas congeladas, como panqueques, bagels y waffles, utilice la función Defrost (Descongelar).
10. Preste atención al tostar productos de repostería, puesto que el relleno puede calentarse mucho antes de que la superficie del producto se haya dorado.
USING YOUR TOASTER

To Toast:

1. Place the toaster on a flat, stable and heat-resistant surface away from the edge and at least 3 inches away from wall or back of counter.
2. Make sure the crumb tray is in place and the bread carriage lever is in the up position.
3. Unwind the power cord and plug into an available nearby power outlet.
4. With the bread carriage in the up position, insert the slice(s) to be toasted.
5. Turn the browning control knob to desired position. The higher the number (1-6), the darker the toast.
6. Press the bread carriage lever down until it locks into position.
7. When the toasting cycle is completed, the toast will rise automatically.
8. To terminate the toasting cycle before it is completed, simply press the CANCEL button.
9. After use, unplug the toaster from the electrical outlet.
10. Never wrap the power cord around outside of toaster. The power cord should be wrapped around the cord storage cavity underneath the toaster.

Using the Bagel Function:

The bagel function toasts the cut side of the sliced bagel while warming the outside for deliciously warm bagels. To do so, the bagel function only uses the heating wires in the middle of the toaster.

1. Slice the bagel to be toasted into two equal halves.
2. Insert the bagel halves into the slots with the cut sides facing each other.
3. Turn the browning control knob to desired position. The higher the number (1-6), the darker the toast.
4. Press the bread carriage lever down until it locks into position.
5. Press the BAGEL button.
6. When the toasting cycle is completed, the bagels will rise automatically.
7. If you wish to stop toasting at any time, press the CANCEL button.

Para tostar:

1. Coloque la tostadora sobre una superficie plana, estable y resistente al calor, alejada del borde y al menos 3 pulgadas de la pared o del fondo de la encimera.
2. Asegúrese de que la bandeja de migas esté colocada y la palanca del portador de pan esté en posición hacia arriba.
3. Desenrolle el cable de alimentación y enchúfelo en un tomacorriente cercano.
4. Asegúrese de que el portador de pan esté levantado y coloque las rebanadas de pan en las ranuras.
5. Gire la perilla de control de tostado hasta la posición deseada. Cuanto más alto sea el número (1-6), más se tostará el pan.
6. Empuje hacia abajo la palanca del portador de pan hasta que se trabe en su sitio.
7. Cuando se complete el ciclo de tostado, las tostadas subirán automáticamente. Para interrumpir el ciclo de tostado antes de que se complete, simplemente presione el botón CANCEL.
8. Después del uso, desenchufe la tostadora.
9. Nunca envuelva el cable alrededor de la tostadora. El cable debe guardarse enrollado en las lengüetas de sujeción que se encuentran debajo de la unidad.

Para hacer rosquillas:

1. Corte la rosquilla en dos mitades iguales.
2. Coloque las mitades de la rosquilla en las ranuras de modo que las superficies de miga queden frente a frente.
3. Gire la perilla de control de tostado hasta la posición deseada. Cuanto más alto sea el número (1-6), más se tostará el pan.
4. Empuje hacia abajo la palanca del portador de pan hasta que se trabe en su sitio.
5. Presione el botón BAGEL (Rosquilla).
6. Cuando se complete el ciclo de tostado, el portador de pan levantará las rosquillas automáticamente.
7. Si desea detener el ciclo de tostado, presione el botón CANCEL (Cancelar).
**USING YOUR TOASTER**

**Using the Defrost Function:**

1. Insert food to be defrosted into the bread slots.
2. Turn the browning control knob to the desired position:
   - **Setting 1-2:** For refrigerated breads and thinner frozen items such as frozen pancakes.
   - **Setting 3-4:** For pastries, frozen waffles, thin French toast and refrigerated bagels.
   - **Setting 5-6:** For thicker frozen items such as bagels, hand cut bread and thick French toast.
3. Press the bread carriage lever down until it locks into position.
4. Press the DEFROST button.
5. When the defrost cycle is complete, the defrosted food will rise automatically.
6. To stop defrosting at any time, simply press the CANCEL button.

**HOW TO CLEAN**

1. Always unplug unit and allow to cool completely before cleaning.
2. Do not use abrasive cleaners. Simply wipe the exterior with a clean damp cloth and dry thoroughly. If a cleaning solution is used, apply to a clean cloth and not directly onto the toaster.
3. To remove crumbs, slide out the crumb tray and discard crumbs. Wipe clean and replace. Never operate the toaster without the crumb tray in place.
4. To remove bread caught in the toaster, unplug from outlet, turn upside down and shake gently. **Never insert any hard or sharp object into the toaster.**
