Congratulations on your purchase of the Aroma Electric Kettle—the best way to boil! This electric kettle is the ideal solution for any need in the kitchen that calls for boiling water in a hurry. It’s perfect for a soothing cup of hot tea, an easy bowl of noodles, an invigorating cup of instant coffee, a hearty helping of oatmeal, delicious hot chocolate and much more!

Faster than the stovetop, your new kettle will boil water at a blazing cup-a-minute speed. And there’s no need to worry about a forgotten kettle, as the electric kettle shuts off automatically once water has boiled. And saving favorite hot beverages to friends and family is made easy as the kettle lifts off the power base for cordless pouring.

**IMPORTANT SAFEGUARDS**

**Short Cord Instructions**

1. A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
2. Longer extension cords are available and may be used if care is exercised in their use.
3. If a longer extension cord is used:
   a. The marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance.
   b. The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled by children or tripped over unintentionally.
   c. The extension cord should be a grounding type 3-wire cord.

**Grounding Instructions**

- **In Canada**
  - This appliance must be grounded while in use to protect the operator from electrical shock. The appliance is equipped with a 3-conductor cord and a 3-prong grounding type plug to fit the proper grounding type receptacles. The appliance has a plug that looks like sketch A. An adapter sketch B, should be used for connecting sketch A plugs to two-prong receptacles. The grounding tab, which extends from the adapter, must be connected to a permanent ground such as a properly grounded outlet box as shown in sketch C using a metal screw.

BEFORE FIRST USE

Before using for the first time, it is recommended to clean the interior of the kettle thoroughly. Please follow the procedures below before using the kettle:

1. Remove all packing materials and make sure that the product has been in good condition.
2. Taking care to keep the electrical components on the exterior of the kettle dry, wipe out the interior of the kettle with a damp cloth. If your hand will not fit inside the kettle, switch warm, soapy water around in the interior of the kettle with the lid closed.
3. Rinse the insides of the kettle thoroughly with water.
4. With a damp cloth, gently wipe off the exterior of the kettle. Do not wipe off electrical components as this may cause damage to the unit.
5. Dry all parts completely.
6. It is recommended to run your kettle through one boiling cycle before using it to consume beverages. Following the instructions in “To Boil Water” on page 5, boil one kettle of water. When water has boiled, pour it out and rinse the inside of the kettle once more. The kettle is now ready for use.
TO BOIL WATER

1. Place power base on a sturdy, level and dry surface.
2. Push the lid release button in while pulling up on the kettle lid to open. Fill with water through the lid opening. Water must be filled between the "Min" and "Max" levels marked inside the kettle.
3. Close the lid, ensuring it locks into place. The lid should click signifying it has been closed securely.
4. Place the kettle onto the power base.

* The stainless steel portions of the kettle will become extremely hot during use and remain hot for sometime after. Do not touch the stainless steel body until the kettle has cooled completely.
TO BOIL WATER (CONT.)

5 Plug the power cord into an available outlet.

6 Press the POWER SWITCH into the "On" ("I") position. The indicator light at the bottom of the kettle will illuminate and the kettle will begin heating the water.

7 Once the water reaches a boil, the POWER SWITCH will automatically turn to the "Off" ("O") position and the kettle will shut off.

8 Using the easy-grip handle, lift the kettle off the power base to serve. Do not touch the stainless steel body, as it will be hot.

9 When finished serving, pour out any remaining water and unplug the power cord.

NOTE

- Never fill kettle with any liquid other than water.
- Never open the lid while water is boiling.
- If the kettle is heated with no water, the internal safety mechanism will automatically turn the kettle off. The POWER SWITCH will not automatically return to the OFF ("O") position. The kettle will begin working again after the kettle is removed from and returned to the base and the internal temperature drops to a safe level. The kettle should function properly when water is added.
Always unplug the kettle and allow it to cool completely before cleaning.

1. Wipe the exterior of the kettle with a damp cloth, taking care to avoid the electrical components.
2. Clean the interior of the kettle with a soft sponge and warm, soapy water. If your hand does not fit in the lid opening, swish warm, soapy water around inside the kettle with the lid closed.
3. Rinse any remaining soapy water from the kettle. Drain.

NOTE
- Never attempt to disassemble the kettle or the power base.
- Never immerse the kettle, power cord, plug or power base in water.
- Always take care not to allow electrical components to come into contact with water.
- Do not use abrasive cleaners or scouring pads of any kind on the kettle or power base. This will cause damage to the finish and may create a risk of electrical shock.
- Any other servicing should be performed by Arona® Housewares.
REMOVING MINERAL DEPOSITS

Hard water can leave mineral deposits that create scale build-up on the interior of the kettle. If mineral deposits occur, follow these steps:

1. Fill the kettle halfway with water.
2. Following the instructions in “To Boil Water” on page 5, bring the water to a boil.
3. Add one cup of white vinegar to the water in the kettle.
4. Allow the mixture to soak overnight.
5. Empty the mixture and rinse out the kettle.
6. Refill the kettle with water only. Bring it to a boil and empty again. Repeat as needed.

HELPFUL HINT
Using distilled water will help to prevent the buildup of mineral deposits.
TRoubleshooting

The kettle and indicator light do not work when the power switch is set to the “On” (I) position.
- Make sure the kettle is seated properly on the power base and that the power cord is connected to a functioning electrical outlet.
- Water or debris on the bottom of the kettle or on the power base may interfere with the function of the kettle. Be sure that the bottom of the kettle and the power base are dry and free of debris.
- If the problem persists, please contact Aroma customer service toll-free at (800) 276-6286 or through email at CustomerService@AromaCo.com.

The water is boiling, but the POWER SWITCH and indicator light do not turn off.
- The auto shut-off function will not operate properly if the lid is not completely closed. Allow kettle to cool, then check to see that the lid is properly locked into place.
- If the problem persists, please contact Aroma customer service toll-free at (800) 276-6286 or through email at CustomerService@AromaCo.com.

There are mineral deposits on the interior of the kettle.
- A certain amount of scale build-up is normal after long periods of use and is caused by minerals contained in hard water. The best way to prevent mineral deposits is to always use distilled water in the kettle.
- To remove deposits, try filling the kettle halfway with water and adding a few slices of lemon, then boil. If this does not work, please see the section on page 8 entitled “Removing Mineral Deposits.”
